Read BUY, HOLD, WAIT/WATCH and SELL
- 3 Screeners & stock details**
Find, filter and assess stocks
- 4 Lists & strategies**
Watchlists, labels and model portfolios
- 5 Trade opportunities & reminders**
Use Pro features effectively
- 6 Risk & good practice**
Assess quality and decide responsibly

01 // START

Get started in three steps

1. Check the dashboard

Start with market conditions, signal cockpit and latest forecasts.

2. Open a stock

Review signal, AI score, risk and all four forecast horizons.

3. Save your selection

Add interesting stocks to a watchlist, label or model portfolio.

Main areas

Dashboard	Personal overview
Screeners	Search the market
Forecasts	Compare signals
Portfolios	Organize selections
Setup	Configure strategies
Help	Tour and guide

Mobile tip

Filters and cards collapse on mobile. Tap a stock row to open more detail. The four forecast arrows remain visible for quick orientation.

02 // SIGNALS

Understand signals

BUY	Model conditions support a potential entry.
HOLD	Maintain a position or continue observing.
WAIT / WATCH	Interesting, but entry conditions are not confirmed.
SELL	The setup is weakening; review position and risk.

Forecast horizons

Arrows show expected direction for 5, 10, 15 and 20 trading days. One arrow is never enough: always include score, confidence, risk, Quality Gate and current price.

5T UP	10T UP	15T UP	20T UP
------------------	-------------------	-------------------	-------------------

AI score	Overall quality of the current analysis
Confidence	Model certainty for this case
Hit rate	Historically correct directional forecasts
Avg./trade	Historical average return per trade
Stability	Consistency across test periods
Risk	Loss and volatility risk

03 // SCREENERS

From screener to decision

1. Search	Enter a company name.
2. Filter	Choose country, sector, signal, score and risk.
3. Sort	Order results by the relevant metric.
4. Assess	Open stock details and historical evaluation.
5. Save	Choose watchlist, label or model portfolio.

Personal organization

Watchlist	Observe stocks informally
Label	Create themes and selection groups
Model portfolio	Test decisions without real capital
Strategy portfolio	Follow a rule-based approach
Saved filter	Reuse and monitor criteria

04 // PRO

Pro trade opportunities

PRO

The opportunity list highlights selected HOLD/WAIT setups with short-term weakness and a positive 20-day outlook. Each opportunity is personal, time-limited and can be reviewed, completed or removed.

Reminders

- Activate a BUY reminder for an opportunity
- Show or hide email appointments on the dashboard
- Manage signal and strategy reminders separately
- Delete one reminder without changing global settings

Use responsibly

Quality Gate

Shows whether minimum model validation requirements are met.

Multiple horizons

Aligned horizons are more robust than a single signal.

Risk profile

Match signals to your goal and loss tolerance.

No guarantee

Model forecasts can be wrong.

Your daily routine

1 Check market conditions and change from yesterday

2 Review new signals and trade opportunities

3 Open stock details including risk

4 Save selections or set a reminder

5 Independently verify and document your decision

IMPORTANT: AktienKI is an analysis and decision-support tool. Content, scores, signals and forecasts are not investment advice or a recommendation to buy or sell. Losses up to total loss are possible.
